Taniwha

Taniwha have a very good Relationship with maori. The Maori have told lots and lots of stories of the taniwha. Taniwha have jobs, one of the jobs is to be a guardian. The taniwha protect the lakes,rivers and the sea. They can build nests. They also have claws to protect themselves.

summary	Taniwha are sea creatures that protect the rivers and seas. They build nests by rivers. They can blend in with the nacher to protect themselves. Some of the taniwha can be dangerous monsters, but most people say they are good.

What are taniwha?

Taniwha can be creatures or objects and can have many different shapes and forms. Some taniwha even change what they look like when it suits them. They might appear as large, giant lizards, as fish such as sharks, as whales, or even as logs of wood. There are also stories of taniwha who look like creatures from another planet!

Māori sometimes leave gifts, such as food, at the homes of taniwha. Taniwha are also celebrated in carvings and buildings, on murals (wall paintings), and in stories.

Some taniwha can change the shape of the land. Awarua was a taniwha who lived in Porirua Harbour. While learning to fly, Awarua crashed into the hills of nearby Mana Island. This made the top of the island flat.

Taniwha as kaitiaki

Māori have worked together with taniwha for hundreds of years and think of them as very special kaitiaki.

There are many stories about taniwha who lived in the sea and guided waka safely to the shores of Aotearoa. Pane-iraira was a taniwha who looked like a whale. Pane-iraira swam with the great Tainui waka and kept those on board safe by calming the waves during storms and rough seas.

Pane-iraira swam with the Tainui waka.

Taniwha also protect the environment and can help us to be better kaitiaki of our lands and seas. If we don't look after these places with care and respect, taniwha can give us a sign that something is wrong. Some people believe that taniwha can get angry and cause problems if their homes are polluted or damaged. If the building of a new road destroys the home of a

How can taniwha help us?

Taniwha can give us helpful information. Some iwi believe that when certain taniwha appear, it's a sign that good weather is on its way. Other stories tell of a taniwha that appears in the sea as a log of wood. This is a sign that crops will grow well or there will be plenty of fish to catch.

How can we help taniwha?

Like taniwha, we can be kaitiaki. Think about the rivers or streams near where you live. How can you help taniwha to keep these places healthy? You could plant trees and shrubs along rivers to help keep the water clean. You could pick up rubbish with your friends at your local beach or lake. And you can be kaitiaki at home by not using too much water when taking a shower, brushing your teeth, and washing the dishes.

Remember that if we keep the homes of taniwha healthy and safe, we can enjoy playing, swimming, and gathering food from these places too!
